## PROFILE

I am currently a 5th-semester student at Bina Nusantara University, majoring in Computer Science with a minor in Event Business and Entertainment. My academic journey has equipped me with a strong foundation in programming, software development, database management, and problem solving, while also developing skills in event planning, marketing strategies, project management, and entrepreneurship. This unique combination allows me to connect technology with creativity and business.

## FEATURED PROJECTS

---

### **Our Bill** *Laravel, Python, OCR, CSS, JavaScript*

[https://github.com/nicojaee/OurBill\\_Splitbill](https://github.com/nicojaee/OurBill_Splitbill)

A split bill application developed with Laravel and a Python backend using OCR technology. Our Bill simplifies group expense management by automatically scanning and processing receipts through OCR. The front end is built with Laravel Blade templates, while the backend leverages Python with Uvicorn for fast and reliable data handling. This project showcases the integration of web frameworks with intelligent automation.

### **Willyfy Music** *HTML, CSS, JavaScript*

[https://github.com/nicojaee/Music\\_Willyfy\\_Website](https://github.com/nicojaee/Music_Willyfy_Website)

A web-based music streaming platform built with HTML, CSS, and JavaScript. Willyfy Music allows users to explore, play, and manage songs through a modern and responsive interface. The project focuses on delivering a seamless listening experience while highlighting front end web development skills.

### **Gestura** *Python, Machine Learning*

[https://github.com/nicojaee/Gestura\\_AI](https://github.com/nicojaee/Gestura_AI)

An AI powered gesture recognition project. Gestura explores the use of machine learning and computer vision to detect and interpret human gestures in real time. The system is designed to demonstrate how AI can enhance human computer interaction, opening possibilities for accessibility and interactive applications.
