FEATURED PROJECTS

Our Bill *Laravel, Python, OCR, CSS, JavaScript* — *https://github.com/nicojaee/OurBill_Aplikasi_Splitbill*

A split bill application developed with Laravel and a Python backend using OCR technology. Our Bill simplifies group expense management by automatically scanning and processing receipts through OCR. The front end is built with Laravel Blade templates, while the backend leverages Python with Uvicorn for fast and reliable data handling. This project showcases the integration of web frameworks with intelligent automation.

Willyfy Music *HTML, CSS, JavaScript* — *https://github.com/nicojaee/Music_Willyfy_Website*

A web-based music streaming platform built with HTML, CSS, and JavaScript. Willyfy Music allows users to

explore, play, and manage songs through a modern and responsive interface. The project focuses on delivering a seamless listening experience while highlighting front end web development skills.

Gestura *Python, Machine Learning*   *https://github.com/nicojaee/Gestura _AI*

An AI powered gesture recognition project. Gestura explores the use of machine learning and computer vision to detect and interpret human gestures in real time. The system is designed to demonstrate how AI can enhance human computer interaction, opening possibilities for accessibility and interactive applications.
